MV-AUDIBLE ALWAYS WORKS WITHOUT INTERFERENCE

PROBLEM — Frequency Flooding leads to the majority of headset problems.

SOLUTION — MV-AUDIBLE runs at 900MHz and is unaffected by Frequency Flooding.

MV-AUDIBLE FAQ

Q - Is there a base station?

A - No, there is no base station required for the MV-AUDIBLE. Simply turn on the Beltpack, and it's ready to use.

Q - Will the MV-AUDIBLE experience interference with the nearby cell towers, scoreboards, media, or Wi-Fi?

A - No, the MV-AUDIBLE operates on a frequency that avoids this interference (900 MHz).

Q - How much battery life do I get on one full charge?

A - 18 hours of Talk-time with a full charge. 2 hours of talk for every 1-hour of charge.

Q - If the opposing team shows up with the same system, will we be able to hear each other's conversations?

A - No, the MV-AUDIBLE Beltpacks are encrypted and paired together at the factory. They are private and secure.

Q - Does the MV-AUDIBLE work through tinted glass?

A - Yes! The MV-AUDIBLE transmits at 900 MHz. This penetrates through tinted glass, concrete, and brick.

Q - What do I do if I need help?

A - First, call customer support. If replacement equipment is needed, MULTIVOICE will send the equipment with expedited shipping.

Q - How else can the MV-AUDIBLE be used?

A - The MV-AUDIBLE can also be used by other programs, such as: track and field, theater, or music and choir.

Q - What is the warranty?

A - The MV-AUDIBLE comes with a 2 year warranty.
